

Find your ring size

A printable guide for an existing ring that fits the intended finger.

1. Print at actual size

Use A4 paper, 100% / Actual size. Turn off Fit to page or Scale to fit.

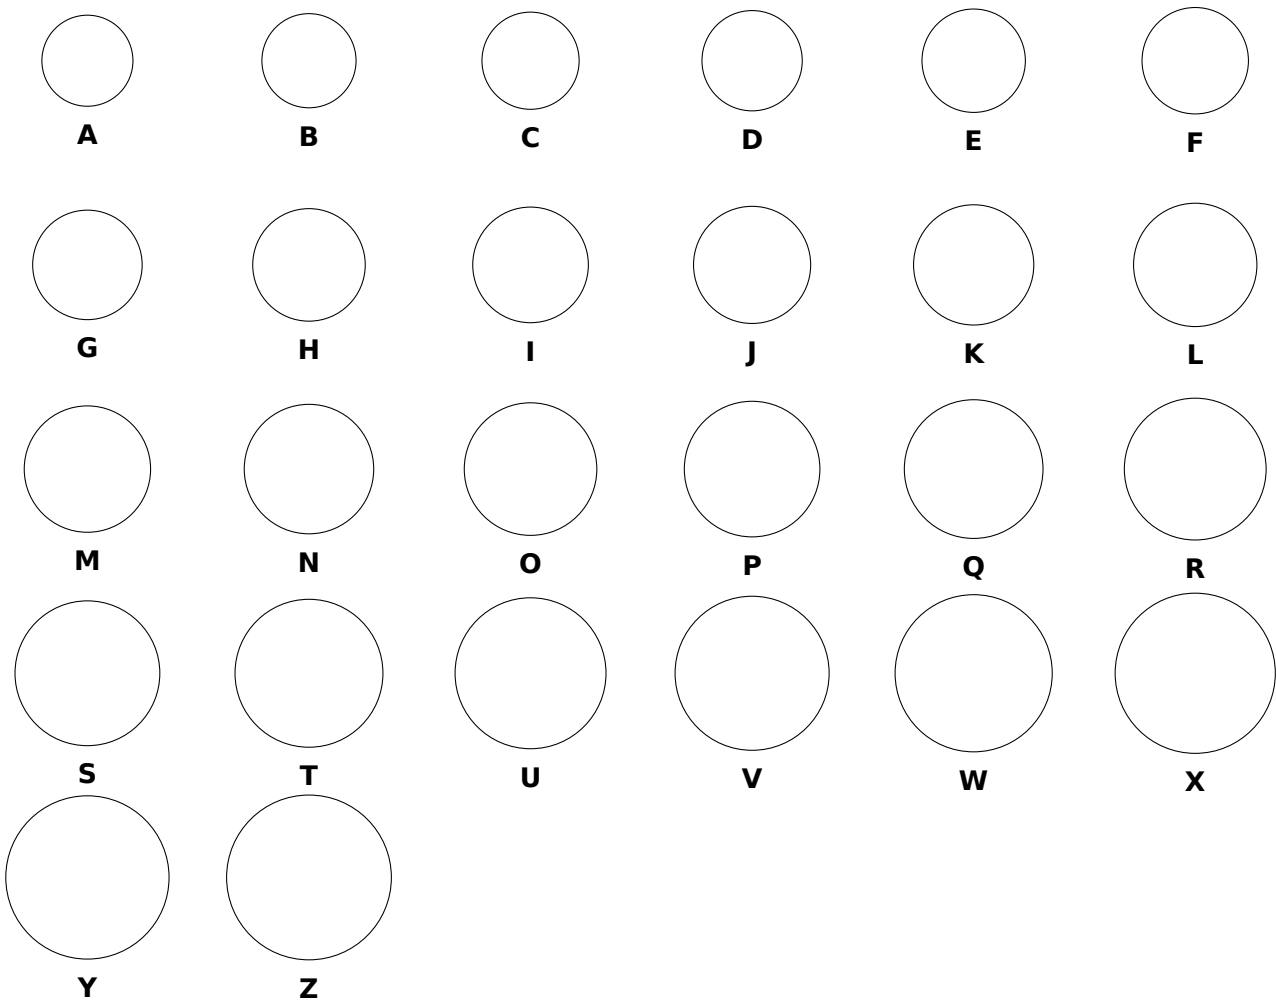

Measure the line below with a ruler. It must be exactly 50 mm.

2. Match the inside edge

Place your ring over a circle. Match the inside edge of the ring to the line.

Use a ring with a similar band width. The letters below are UK sizes.

A comfortable fit

Measure when your hands are at a comfortable temperature; fingers change size.

Your ring should feel secure, yet pass over the knuckle with gentle resistance.

Wider bands can feel tighter. Half sizes may help when you fall between letters.

Paper or string can stretch and give an inaccurate result; treat that method as a rough check.
